WASH TABLE CLEANING STATION

FOR MANUAL CLEANING

**INDIVIDUAL
AND PRACTICAL**

INDIVIDUAL AND PRACTICAL

The PERO wash table is a workplace for the manual cleaning of various workpieces with cold cleaners.

The workpieces, such as repair and production parts, are lowered with the product carrier into the dip basin. Circulating the cold cleaner by means of a pump dissolves and washes impurities away.

Persistent impurities can be manually treated with the application brush. For this, the product carrier is brought into the drip position.

- + The cleaning medium in the basin is pumped and filtered in a continuous loop
- + The basin and table are made of polished stainless steel, unpainted
- + Standard with splash guard wall
- + Brush and basket included
- + Floor pan and exhaust ventilator optional

TECHNICAL DETAILS

Cleaning station external dimensions

Cleaning media	
Sprayable, hydrocarbon cold cleaners with a flash point above 60 °C	
Batches / Goods carriers	
External dimensions (LxWxH), max.	500 x 400 x 200 mm
Combinations on request	
Batch weight, max.	50 kg
Work height	900 mm

Performance data	
Connected load, approx.	0.2 kW
Special voltage on request	
Wash pump	30 l/min
Pump pressure	0.2 bar
Volume immersion basin	75 l
Options	
e.g. floor pan, exhaust ventilator
